

## **Session 2 Practice Activities**

1. Try to figure out how many people were born in the month of May. Hint: When using summarize, you can use `n()` to count the number of rows with each value.
2. In what state was participant #7 born?
3. Which state has the tallest population based on our data? (You can focus only on people between 5'0" and 5'11" for simplicity.)
4. What is the mean experience level in R for each CollegeYear?
