

Session 3 Practice Activities

1. Which state has the highest average R experience? What would be the best way to visualize this?
2. How many people said “Yes” vs “No” to the Last Question? Should you plot this with a bar plot or a column plot?
3. Which lab had the highest number of people answer “Yes” to the Last Question? What about proportions instead of raw count? Should you plot this with a bar plot or a column plot?
4. Can you plot height by year in college? Do you see any pattern in the plot?
