

Welcome to QuACK!

Week 5

10/08/2026

Nina, Alyson, and Victoria

Structure of the course

Week 1	9/10	Intro to R & Programming
Week 2	9/17	Intro to the tidyverse and data wrangling - Part 1
Week 3	9/24	Intro to the tidyverse and data wrangling - Part 2
Week 4	10/1	Intro to data visualization (ggplot) - Part 1
Week 5	10/8	Intro to data visualization (ggplot) - Part 2
Week 6	10/15	Error Messages/Review/Q&A
Week 7	10/22	Intro to Basic Stats - Part 1
Week 8	10/29	Intro to Basic Stats - Part 2
Week 9	11/5	Putting it all together
Week 10	11/12	**NO CLASS**
Week 11	11/19	Open-Science, Github & Git

UC Berkeley

Today's Agenda: Plotting (cont.)

- Warm-up activity
- Graph Tips / Guidelines
- Themes
- Color/Fill Brewer
- Demo: data visualization + bootstrapping

UC Berkeley

Week 3 Warm-up – 10 minutes

1. Download this week's materials from this link: https://tinyurl.com/quack-fall2026
2. Open the practice PDF from **last week** (session 4)
3. If you did the practice exercises during last week's session, refresh your memory on what you did and what the answers were
4. If you didn't get a chance last week, try the practice exercises now!

UC Berkeley

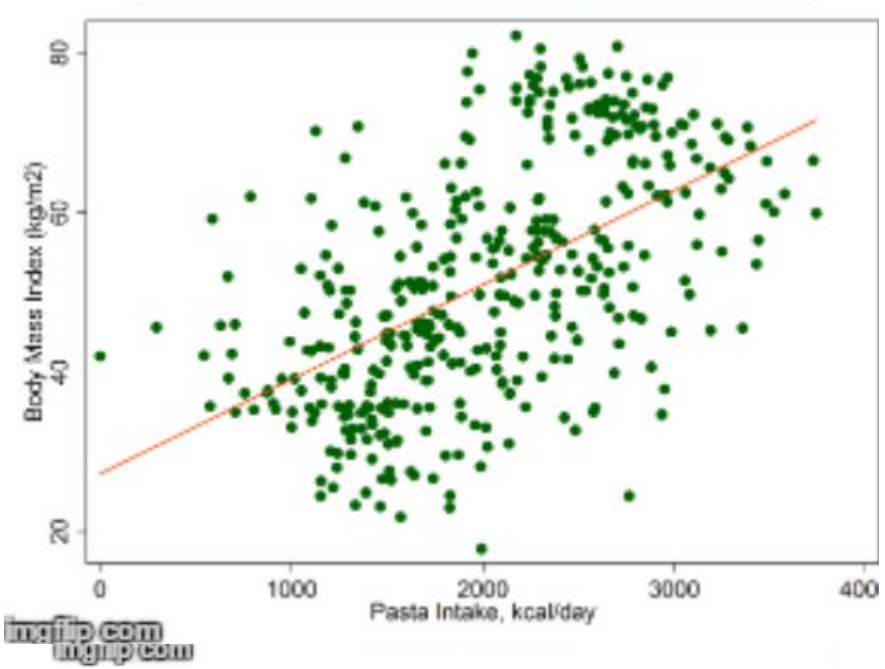

Graphs Tips/Guidelines

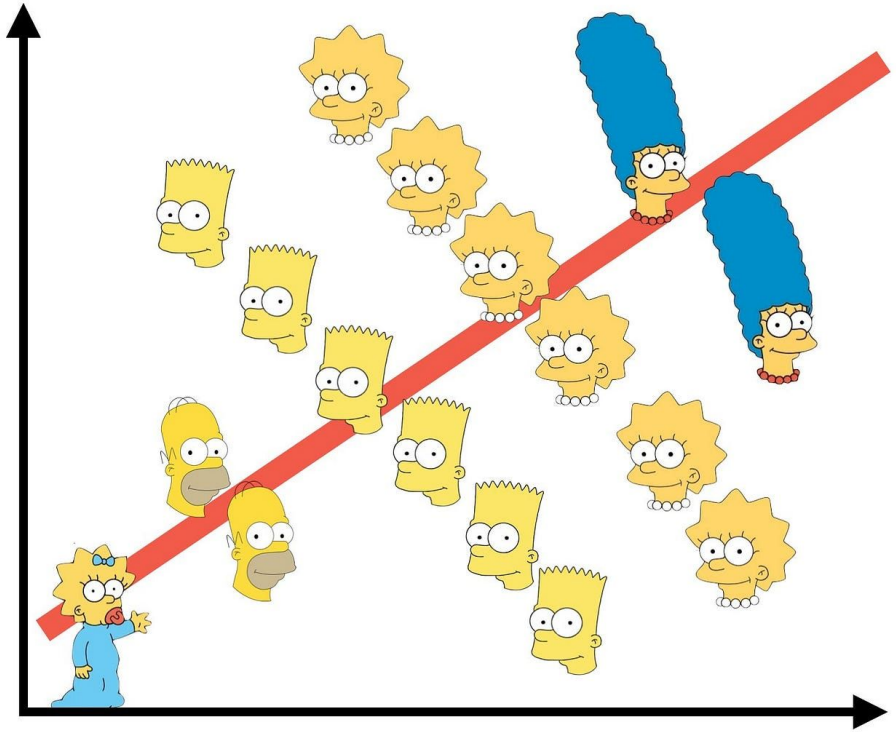

- Readability: The best graphs require no one to explain them
  - Clear axes, legend, and title labels
  - Don’t overwhelm the reader (not too much on one plot)
  - Use guidelines as needed (e.g., chance/neutral)
- Consistency:
  - Consistent axes ranges
  - Consistent and well-used facet wrap
  - Consistent theme and coloring
- Presentation:
  - When presenting, show it piece-by-piece
  - Use non-default palettes (e.g., the colorblind-palette)
  - Jitter/dodge so data can be seen clearly

UC Berkeley

Graphing Helps Us Spot Trends and Patterns

But sometimes we need to be careful about the inferences we make

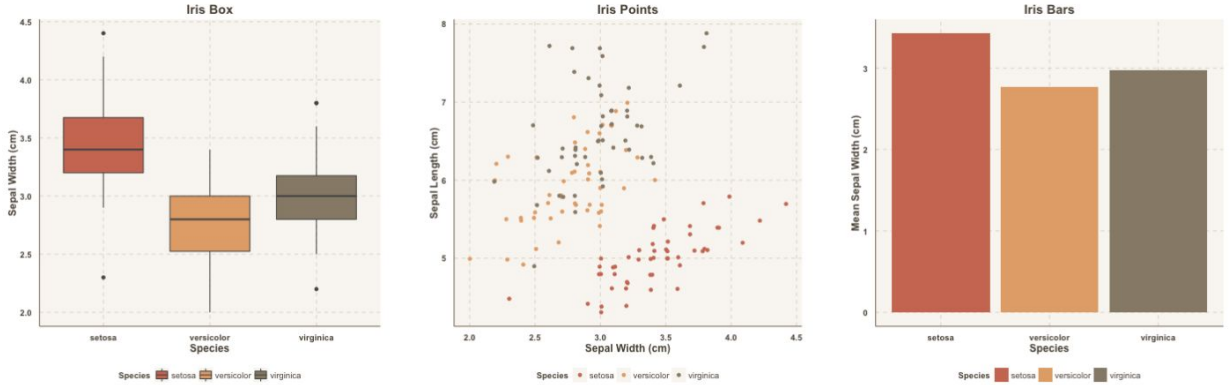

UC Berkeley

Exploring Themes

- Many built-in ggplot themes (see here: https://r-graph-gallery.com/192-ggplot-themes.html)
- Additional themes here: https://github.com/Mikata-Project/ggthemr#palettes

UC Berkeley

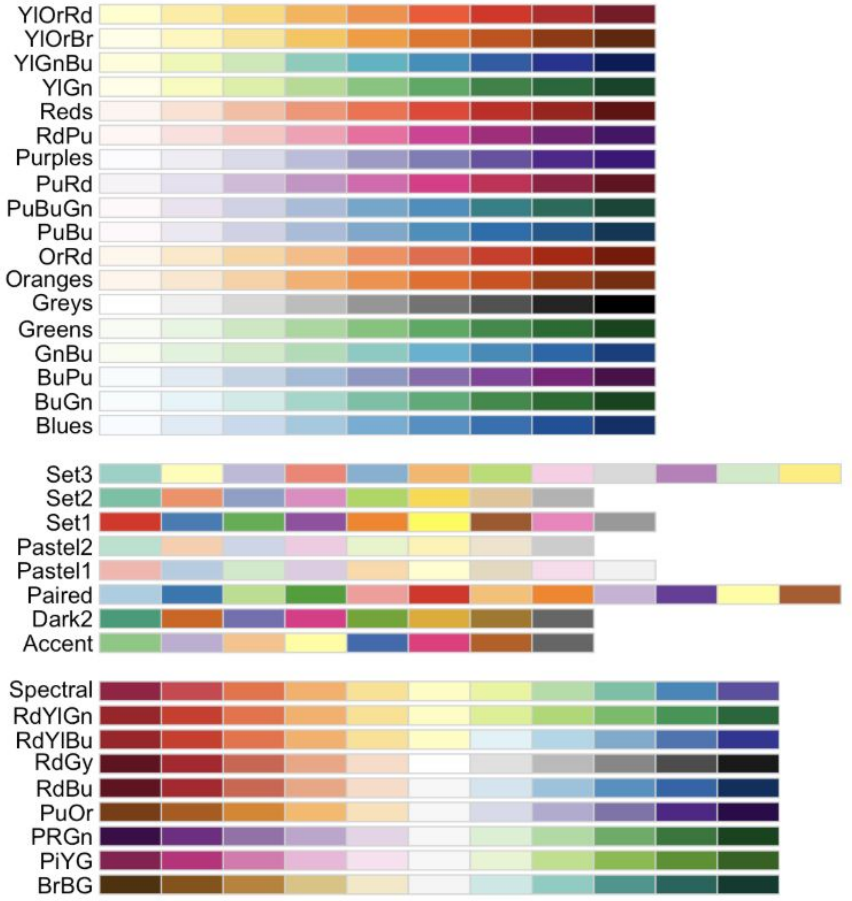

Exploring Color Palettes

Some options:

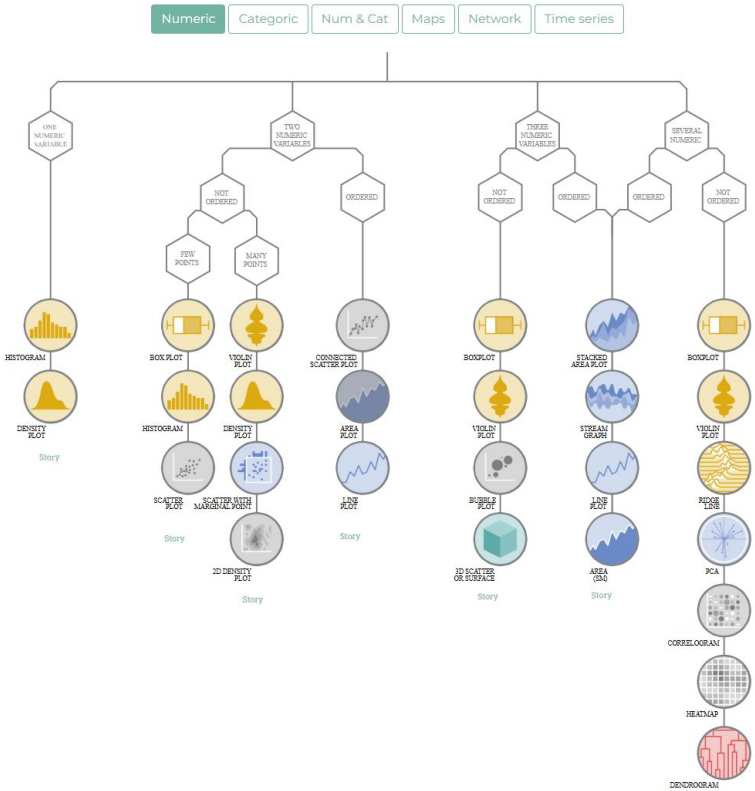

- Scale color/fill brewer

  Scale Color Brewer
- Palletteer

  Color Palette Finder

A helpful dataviz resource: https://www.data-to-viz.com/

UC Berkeley

Time to get started in R!

- Go to https://tinyurl.com/quack-fall2026
- Download and unzip the course materials
- You will see many files:
  - Two R Markdown (.rmd) files
  - A .csv file
  - Two PDF files – slides and a practice doc
  - Some other folders – ignore these for now
- Open the R Markdown file marked “starter_code” – this is where we will code together for the first part of the session
- The .csv file contains the data we will be working with
- The practice PDF contains practice exercises for you to do during the second part of the session

UC Berkeley

Exit Ticket
